EDUCATION

Montana State University | Bozeman, MT

May 2026

B.S. in Computer Science | GPA: 3.3/4.0

Courses: Machine Learning, Compilers, Software Engineering, Computer Science Theory

TECHNICAL SKILLS

Languages: Java, PHP, C#, Python, C, UML, HTML, CSS, Gherkin

Tools and Frameworks: Selenium, Playwright, Node.js, React.js, AngularJS, Docker, PyTorch, Git

Soft skills: Coachable, Quick learner, Highly motivated, Self-sufficient, Problem solver

PROFESSIONAL SUMMARY

Motivated and versatile Computer Science student at Montana State University with hands-on experience in software testing, web development, and machine learning. Skilled in multiple programming languages and modern frameworks, with a proven ability to learn quickly, solve complex problems, and adapt to evolving technologies. Experienced in leading teams, mentoring students, and managing projects under pressure. Strong foundation in automation testing, full-stack development, and algorithmic implementation, complemented by creativity and self-sufficiency developed through both technical and personal projects.

RELEVANT EXPERIENCE

MilTech Student Intern

6/2025 - Present

- Developing and maintaining automated test suites for a DoD web system using Selenium and Playwright
- Converted English test definitions into structured Gherkin scenarios
- Led the testing team and resolved Angular-related UI automation issues

U.S. Department of State Selected intern

Summer 2025

- Selected for a competitive federal internship (rescinded due to budget cuts)
- Passed full background investigation and obtained interim **Secret** clearance

Hooked Sushi Cook

2/2024 - 6/2025

- Managed the Hot Kitchen in a high-pressure, fast-paced environment
- Demonstrated exceptional multitasking, time management, and reliability under peak demand

PROJECTS

Satellite Tracking Web App

- Built a full-stack satellite tracking tool using Node.js, Three.js, and React
- Implemented real-time satellite visualization and API data retrieval
- Debugged CORS, JSON parsing, and dev-server issues to ensure stable deployment

Resume website

- Created and launched a personal resume website using PHP to display multiple pages, as well as take in user data and send an email when a new user signs in
- Used to expand my resume and self-teach PHP

Machine Learning Implementation

- Implemented Particle Swarm Optimization and a Neural Network from scratch
- Collaborated in a two-person team using Git for version control and workflow management

LEADERSHIP EXPERIENCE

NASA HUNCH Student Mentor

9/2025 - Present

- Mentored high school students while they worked on a NASA Hunch project
- Refined my leadership skills while directing students without giving them the answers
